Paulette's Leadership Vision

Our current reality is playing out in the truest sense of a VUCA world: Volatile, Uncertain, Complex, and Ambiguous. Strong, effective, and resilient leaders are critical to stabilize organizations while also defining future opportunities. Current and future leaders must possess and incorporate critical emotional intelligence skills. In all times, but especially in times of crisis, operating from both the heart and the head better enables them to make tough, rational decisions to protect financial performance —and to do so with empathy and compassion that comes from an understanding of how such decisions impact the people involved.
